# AEP Advisory Services

AEP brings deep technical and execution expertise to ensure companies achieve success in capital project development and excellence in operational execution. AEP has an innovative and revolutionary thinking mindset and applies this philosophy to the world's most complex challenges to provide a sustainable and real change in performance.

## ENGAGEMENT

"Creating a culture of meaningful engagement, fostering collaboration and empowerment to drive organizational excellence and success."

## SAFETY

"Championing a culture of unwavering safety, ensuring the well-being of all stakeholders and fostering a secure environment for success."

## JUDGEMENT

"Empowering organizations to make informed decisions and achieve sustainable success through insightful judgment and strategic guidance."

## LEADERSHIP

"Fostering a culture of inspired and impactful leadership, driving organizations towards excellence and innovation."

## EXPERTISE

"Elevating organizations through unparalleled expertise, driving transformative results and sustainable growth."

## WHY ARE WE DIFFERENT!

**Operational Maturity Modeling** AEP SMEs have worked in the best organisations globally with real world experience, they know what is needed not just to provide compliance, but to build a robust practical framework to meet the needs of any client. Further, they will work with your teams on the ground to ensure these systems are aligned, embedded and owned by the people who will be responsible for the outcomes your organisation needs to be recognised for consistent and reliable quality. Providing certainty for your clients and for you, and most importantly safe outcomes for your people, partners, and the planet.

**Performance Measurement Cycle** Our AEP framework integrates your data workflow process within your existing reporting cycle. We integrate and work with you to train, upskill and mentor owners of the source data (contractors) to setup and agree the source data content, KPIs, structure and templates etc. AEPs focus is on improving the source data to act as the single source of truth as the data flows through the various workstreams.

AEPs ethos is to be a catalyst for organizational eco-systems, to achieve targets, underpinned by operational excellence, financial governance and measured performance. It is our purpose to provide a clear project roadmap from the onset of a concept, that is sustainable. Aligning the project execution strategy around the business strategy. AEPs methodologies are agile and adaptable, moving legacy processes through to a revolutionary space where innovation meets creation, resulting in a new future of realised excellence.

AEP drives true value realisation by creating the capability in companies so that they can operate independently and have the solutions to successfully build and operate (where required) in complex social economic and geographic environments. We think differently, instilling a desire in the Project Management sector to secure reliable partners to service your individual bespoke needs, ensuring that spending in capital on projects (assets buildout) is wise and effective, delivering project certainty as a reality not just an intent, safely, on budget and within schedule.

## THE AEP WAY!

Where innovation meets creation, not just intent.

We have the people, skills and resources needed to meet your demands and bring your vision to a reality.
